The Jardine Matheson Group in Hong Kong and mainland China focuses its philanthropic activities on the under-resourced area of mental health. Led by the Jardine Ambassadors, the MINDSET programme aims to raise awareness and understanding of mental health issues and to change attitudes, while at the same time providing practical support for charitable initiatives in the sector.

MINDSET is a registered charity in Hong Kong established by the Group over ten years ago to spearhead the initiative.

In Singapore, the Group has also set up a sister organization, MINDSET Care Limited, in 2011 to support the mental health sector in the city-state.

MINDSET has received strong support from Group companies, including Dairy Farm, Hongkong Land, Jardine Motors, various companies within Jardine Pacific, JLT and Mandarin Oriental.

Driven by the Jardine Ambassadors, young volunteer executives across the Group, MINDSET aims to change people's attitudes by raising awareness and understanding of mental health issues, and to provide direct assistance for individuals, families and organizations in need of help.

MINDSET supports non-governmental organizations (NGOs) within the mental health sector in the form of in-kind donations, volunteer services, work experience and cash donations, and works alongside government agencies.

MINDSET’s initiatives are focused on (i) Education and Prevention; (ii) Reintegration; (iii) Financial Support; and (iv) Community Awareness and Fundraising. Details are outlined in the following progress reports covering the period from 1st July 2012 to 30th June 2013.

Over 40,000 hours were contributed by 76 Jardine Ambassadors in 2012/13.

Chairman’s Message

We hope that we are making a difference with our programmes and enhancing the lives of those who are in need within the mental health field.

Ben Keswick

Following the celebration of our 10th Anniversary in June 2012, MINDSET geared up for another exciting decade of striving to make a difference in the area of mental health.

Over the past year MINDSET has been very active. We continued to organize the ‘Health in Mind’ youth education programme in schools; we supported the residents at MINDSET Place; we arranged for job training opportunities within the Group companies for service users; and we held a range of activities with service users and our colleagues in Group businesses. MINDSET also gave further support to school students in Sichuan, mainland China, through the school mental health programme.

In early 2013, we were pioneers in funding Hong Kong’s first train-to-work project for peer support workers. Run by four NGOs, this initiative equips service users who are well on their way to recovery with the right knowledge and skills to assist others who are facing similar challenges. The first graduates of the project have now been assigned to organizations where they share their experiences to help others who are on their own journey. I hope that this project, which has proved effective in Australia and the United States, will achieve similar successes in Hong Kong.

MINDSET’s achievements are due to the efforts of our people within the Jardine Matheson Group and our partners. A big thanks must go to the Jardine Ambassadors, who have played a key role in running the various MINDSET events. I am grateful too for the support of the MINDSET Coordinators from across our Group companies, and for the contribution of our Advisers and Steering Committee members. We also owe a great deal to our associates from the NGOs and government agencies, who provide invaluable assistance and advice.

In the eleven years since MINDSET was founded we are still learning. Yet we hope that we are making a difference with our programmes and enhancing the lives of those who are in need within the mental health field and the community at large. We look forward to another year of progress.

Ben Keswick
Chairman
8th July 2013

Donations

Thirty-four percent of MINDSET’s HK$7 million cash donations in 2012/13 went to the direct services for adults suffering or having recovered from mental illnesses. Training workshops, vocational assessment and counseling, and professional care services were provided to help individuals who have recovered from a mental illness to reintegrate into society.

Twenty-six percent of the funding went to services that supported children and teenagers who were in need, while approximately 4% of the funding was allocated to supporting the carers who are in need of emotional support when dealing with the pressure of taking care of family members who suffer from a mental illness. They benefited through experience sharing and knowledge obtained in mutual help groups and training sessions organized by the NGOs supported by MINDSET.

Through the Health in Mind programme, MINDSET promotes mental wellness and understanding by empowering adolescents with knowledge and establishing positive attitudes towards mental health issues. Over 36% of MINDSET’s funding in the year of 2012/13 was allocated to public education among young people.

2012/13 Allocation of HK$7 Million Cash Donations*

- 34.4% Adults suffering or having recovered from a mental illness
- 10.0% Youth who suffer from a mental illness
- 15.5% Children who suffer from a mental illness/Children in-need
- 3.9% Carers of individuals who suffer from a mental illness
- 36.2% Public/Youth education

* For the period from 1st July 2012 to 30th June 2013.

Progress Report
Education & Prevention

Education is a key focus of the MINDSET programme. A number of activities were held to raise awareness of mental health among the younger generation of Hong Kong.

Health in Mind Programme
The Health in Mind Programme, organized and funded by MINDSET and in collaboration with Hong Kong’s Hospital Authority since 2002, promotes positive attitudes towards mental health among the youth. With Jardine Ambassadors leading the efforts, the programme aims to empower secondary school students as advocates to promote mental health to fellow students, their families and the public at large through interactive activities and experiential personal development training.

The programme had several components, including themed workshops in conjunction with Kwai Chung Hospital covering various mental health issues such as self-image and eating disorders, emotions management, and anti-drug abuse. The students also participated in volunteering services through activities with individuals who suffer from a mental illness. Through discussions with Jardine Ambassadors, the students were able to deepen their understanding of mental health issues and learn from their own experience.

The programme has been successful thanks to the guidance from the healthcare professionals from the Hospital Authority, the clinical psychologist from MINDSET, and teachers of the participating schools.

City Orienteering
Over 250 participants, including student advocates from ten Health in Mind schools, service users from Castle Peak Hospital, Kwai Chung Hospital and Phoenix Clubhouse, and Jardine Ambassadors, joined the activity in January 2013.

Students were divided into 49 teams with the objective of finding their way to various checkpoints in Kowloon and completing assigned tasks before finishing at Kwai Chung Hospital. The event provided opportunities for the students and service users to interact with each other in the game through route planning, money management, problem solving and decision making.

“We worked as a team and accommodated different viewpoints as we navigated between the checkpoints,” said Jardine Ambassador Vivian Li of 7-Eleven. “It was great to see students and service users getting along so well and taking care of each other throughout the journey.”

“We worked as a team and accommodated different viewpoints as we navigated between the checkpoints,” said Jardine Ambassador Vivian Li of 7-Eleven. “It was great to see students and service users getting along so well and taking care of each other throughout the journey.”

Cultivating Positive Attitudes towards Mental Health
In total, the Health in Mind programme supported more than 336 student advocates from 24 secondary schools in Hong Kong in the school year of 2012/13. Over 160 in-school activities, volunteer services, interactive workshops and seminars were organized through the school year, benefiting approximately 11,000 students, parents, teachers and people suffering or recovering from mental illness.

Since the launch of the Health in Mind programme in 2002, over 89,000 students, their teachers and parents from 59 secondary schools have benefited from the programme. By playing an active role in the programme, student advocates have shown positive changes in their attitude, behaviour and spiritual wellbeing.

Each year, outstanding students selected from the programme are offered short-term job placements within Jardine’s business units to gain work experience.

Further details of the programme are available on Health in Mind’s dedicated website: www.healthinmind.org.hk.

Progress Report
Reintegration

Reintegrating individuals who have recovered from a mental illness into the community helps improve their quality of life. In light of this, MINDSET undertakes job training programmes within Jardine Matheson Group companies, as well as engages in reintegration activities alongside the reintegration services of mental health hospitals and NGOs.

Job Training Programme
Under the job training programme, Group companies have offered service users training opportunities or contract term employment ranging from a few weeks to one year. The Jardine Ambassadors have partnered with Baptist Oi Kwan Social Service, Caritas Hostel – Fanling, Caritas Jockey Club Lai King Rehabilitation Centre, Castle Peak Hospital, Fu Hong Society, Kwai Chung Hospital, the Mental Health Association of Hong Kong, New Life Psychiatric Rehabilitation Association, Phoenix Clubhouse and Richmond Fellowship of Hong Kong since the launch of the programme in 2005.

During the 2012/13 year, 13 Group companies offered recovered individuals 41 training positions ranging from one to six months designed to prepare them to re-enter the job market. Three group placements on mass mailing were also made available. A total of 59 individuals participated in the programme and a good proportion were offered permanent jobs in the market after the placement in Jardines. The programme has benefited over 970 recovered individuals since inception.

Eve Lau, who has recovered from a mental illness, joined the job training programme in Hongkong Land. She was happy to have the experience. She said, “I am grateful to have been given a job training opportunity which paved my way for getting back to work and back to life. I felt the acceptance, respect and support from my supervisors and colleagues at the workplace, which was important to me.”

To encourage the hiring of more people who have recovered from a mental illness throughout the Group, MINDSET organized two half-day workshops for Jardines employees imparting knowledge on how to work with them. Clinical psychologists, occupational therapists and social work professionals were invited to discuss their experience in helping recovered individuals reintegrate into society.

She said, “I am grateful to have been given a job training opportunity which paved my way for getting back to work and back to life. I felt the acceptance, respect and support from my supervisors and colleagues at the workplace, which was important to me.”

Reintegration Activities
The Jardine Ambassadors worked with two specialist hospitals and other mental health organizations to hold 13 reintegration activities in the past 12 months, benefiting 1,000 people. The beneficiaries came from a number of NGOs, including Baptist Oi Kwan Social Service, Caritas Hostel – Fanling, Caritas Wellness Link – Tsuen Wan, Castle Peak Hospital, Kwai Chung Hospital, New Life Psychiatric Rehabilitation Association, MINDSET Place, Richmond Fellowship of Hong Kong, the Boys’ and Girls’ Clubs Association of Hong Kong, the Mental Health Association of Hong Kong and Tuen Mun Hospital.

Work and Play
The Jardine Ambassadors organized a wide range of activities to help enhance the work, social and self-care skills of those who suffer or have recovered from a mental illness, in collaboration with the partnering NGOs and hospitals. For example, a computer training course was held to teach service users basic skills for using software for the workplace.

In addition, the Jardine Ambassadors visited the live-alone service users to show care and love in the 2013 Chinese New Year. In a pizza making workshop organized for service users of Caritas in Fanling by Pizza Hut Hong Kong’s Jardine Ambassadors, the participants visited the back-of-house operation, made their own pizzas, and learned tips on table etiquette.

Thanks to MINDSET for the job training opportunities it provides to our service users. Our service users are thus able to work in an office environment within Jardines, which is invaluable in enhancing their self-confidence.

Wan Siu Man
Executive Officer of the Occupational Therapy Department of Kwai Chung Hospital

Service users of Caritas in Fanling enjoy a pizza making and table manners workshop organized by Jardine Ambassadors from Pizza Hut Hong Kong.

Chloe Tsui
Peer Support Workers course graduate 2013

In 2012/13, MINDSET funded a number of projects that benefited individuals who suffer from a mental illness, and their carers and families.

**MINDSET Place**

MINDSET Place is a long stay care home with a high standard of professional care services for people recovering from chronic mental illnesses.

New Life Psychiatric Rehabilitation Association has been appointed by MINDSET to operate MINDSET Place. The home is fully occupied providing residential care services for 38 service users. As of May 2013, seven residents were engaged in open employment, nine took up cleansing work training in New Life’s supported employment service, 12 were attending sheltered workshops, and the remainder were attending cleansing, horticultural and handicraft training at MINDSET Place.

During the past 12 months, the residents joined a range of recreational programmes provided by MINDSET Place including a table tennis course, a visit to the flower show in Victoria Park, a sightseeing tour to the Hong Kong Wetland Park, as well as participating in festive and birthday celebrations.

The MINDSET Place residents were pleased with the facilities and living environment. In an evaluation study conducted in 2013, the residents and their families rated positively on the overall service provision of MINDSET Place.

**Peer Support Workers Project**

MINDSET has invested in a three-year pilot project starting in August 2012 in Hong Kong, which aims to train people who have recovered from a mental illness to help others who are undergoing similar challenges.

The ‘MINDSET Peer Support Worker Project’ launched its first training course run by four agencies – Baptist Oi Kwan Social Service, Caritas – Hong Kong, the Mental Health Association of Hong Kong, and New Life Psychiatric Rehabilitation Association – setting a new milestone for psychiatric rehabilitation in Hong Kong.

The first 18 graduates in the project completed the course in April 2013, in which they undertook training sessions and practical work at a halfway house, sheltered workshop or integrated community centre for mental wellness. The training sessions covered a wide range of topics, which included the concept of peer support, a Wellness Recovery Action Plan, communication skills, codes of conduct and crisis intervention.

The course has enhanced the trainees’ self-confidence, according to F. Y. Lin, one of the graduates. Lin finds it meaningful to share her experience with those in need. The graduates have taken up posts, alongside social workers, in peer support and drop-in roles at various facilities where they bring hope and insights to service users in various stages of recovery.

**Support to The Community Chest of Hong Kong**

Dairy Farm, Gammon Construction, Hongkong Land, Jardine Engineering Corporation, Jardine Matheson Limited and Zung Fu continued their support to the Community Chest by making cash donations for mental health related projects. Funds were allocated to Christian Oi Hip Fellowship, Regeneration Society, Family Welfare Society and St. James’ Settlement. Staff from various Group companies also supported the Community Chest’s Dress Special Day, Love Teeth Day and Skip Lunch Day, raising over HK$96,000 in support of the Chest’s mental health related services.

**Expanded School Mental Health Network – Sichuan**

MINDSET supported the “Expanded School Mental Health Network” organized by the Hong Kong Polytechnic University to engage primary school students in a “life education programme” to promote mental health through an all-round personal development. The programme aims to provide integrated service to primary school students in Sichuan. It helped increase the connection and support among the schools, families and the community through casework, group work, prevention programmes and community projects.
After finishing the course, I am currently working at Tin Shui Wai Wellness Centre under New Life. I hope to share my experience with those recovering from mental illness.

Community Awareness & Fundraising

The 2013 event raised a record HK$3.7 million, from which all proceeds went to MINDSET. Over 500 staff from Group business units, business associates, families and friends took part in the event. Participants ran – and some walked – up 49 floors to reach the Penthouse at the top of Jardine House.

**CENTRAL Rat Race**

The annual CENTRAL Rat Race, run by Group company Hongkong Land, is another signature event that raises funds for MINDSET. Held in Hong Kong’s principal business area, Central, more than 460 participants completed the course of the seventh CENTRAL Rat Race, raising a record HK$2.65 million in October 2012.

“CENTRAL Rat Race is an excellent platform to raise awareness of the good work mental health organizations do in Hong Kong, as well as of the importance of maintaining work-life balance in such a fast-paced business environment,” said MINDSET Chairman and Group Managing Director Ben Keswick.

Our residents greatly enjoyed the outing organized by the staff from Dairy Farm during the Mini-MINDSET Day. They eagerly shared their happy moments with those who had not joined upon returning to the hostel and looked forward to participating in other MINDSET activities.

Tam Siu Po
Project Executive of Hin Kin House, the Mental Health Association of Hong Kong

**Mini-MINDSET Days**

MINDSET has been well supported by the Group companies of Jardine Matheson. In the year of 2012/13, 13 Group companies organized their own ‘Mini-MINDSET Days’, where Jardine Ambassadors and staff of individual Group companies partnered with different NGOs to hold an assortment of one-day programmes for the recovered service users.

An outing to the Tai Tong Organic Farm was organized by Jardine Ambassadors from Jardine Engineering Corporation for service users from the MINDSET Club of Castle Peak Hospital, whereas the joint team from Pizza Hut Hong Kong and Hongkong Land enjoyed kite-flying and barbecue at Greenfield Garden in Tin Shui Wai with service users from New Life Psychiatric Rehabilitation Association. In an event for the Mental Health Association of Hong Kong, service users joined the Ambassadors from Jardine OneSolution and Mandarin Oriental Hotel Group for a bowling fun day in Shatin.

**Noonday Gun**

Individuals or organizations who donate a specified sum to MINDSET may fire the Jardines Noonday Gun, a tradition that dates back to the very early days of Hong Kong.

MINDSET has been well supported by the Group companies of Jardine Matheson. In the year of 2012/13, 13 Group companies organized their own ‘Mini-MINDSET Days’, where Jardine Ambassadors and staff of individual Group companies partnered with different NGOs to hold an assortment of one-day programmes for the recovered service users.

An outing to the Tai Tong Organic Farm was organized by Jardine Ambassadors from Jardine Engineering Corporation for service users from the MINDSET Club of Castle Peak Hospital, whereas the joint team from Pizza Hut Hong Kong and Hongkong Land enjoyed kite-flying and barbeque at Greenfield Garden in Tin Shui Wai with service users from New Life Psychiatric Rehabilitation Association. In an event for the Mental Health Association of Hong Kong, service users joined the Ambassadors from Jardine OneSolution and Mandarin Oriental Hotel Group for a bowling fun day in Shatin.

**Contributions from Group Companies**
Group companies have made cash donations of some HK$3 million for MINDSET in the year of 2012/13, in addition to the donation of HK$1 million each from Maxim’s Caterers and Hong Kong Caterers.

Noonday Gun
Individuals or organizations who donate a specified sum to MINDSET may fire the Jardines Noonday Gun, a tradition that dates back to the very early days of Hong Kong.

Each year, Jardine Ambassadors undertake a range of initiatives to solicit community support and raise funds for mental health related causes. Funding support is also received from Group companies.

**Walk Up Jardine House**
The biggest fundraiser for the year for MINDSET, the annual Walk Up Jardine House, is organized by the Jardine Ambassadors.
Jardine Ambassadors

**Current Ambassadors (2012-14)**

- Lawrence Chan (Hong Kong Land)
- Mio Cheang (Gammon Construction)
